Alation + Databricks: Scale Your Lakehouse and Democratize Data Intelligence Across Your Enterprise

The Alation Agentic Data Intelligence Platform complements your Databricks Lakehouse by democratizing access to trusted data products, while complementing Unity Catalog to scale your data governance efforts across your entire data estate.

Agentic AI on the Lakehouse

Alation Agents automate data documentation, business metadata enrichment, data quality, and governance on Databricks, enabling organizations to accelerate the delivery and adoption of data, analytics, and AI initiatives across the business.

Documentation Agent
Drive faster adoption of Databricks across business domains by providing automated metadata extraction, asset documentation, and domain-specific context to accelerate self-service data discovery and data literacy

Data Quality Agent
Scale data quality and data observability monitoring with AI and metadata to ensure trusted Databricks assets drive confident decision-making

Data Products Builder Agent
Develop secure, context-aware AI applications built on Alation's intelligent metadata layer to deliver tailored insights across organizational domains

Better Together Integration

Unified Governance Across the Enterprise

Amplify your governance reach with Alation's 120+ connectors across File Systems, ERPs, RDBMS, SaaS apps, and BI Tools to augment Unity Catalog capabilities and implement comprehensive data governance across your entire data estate, ensuring compliance and trust.

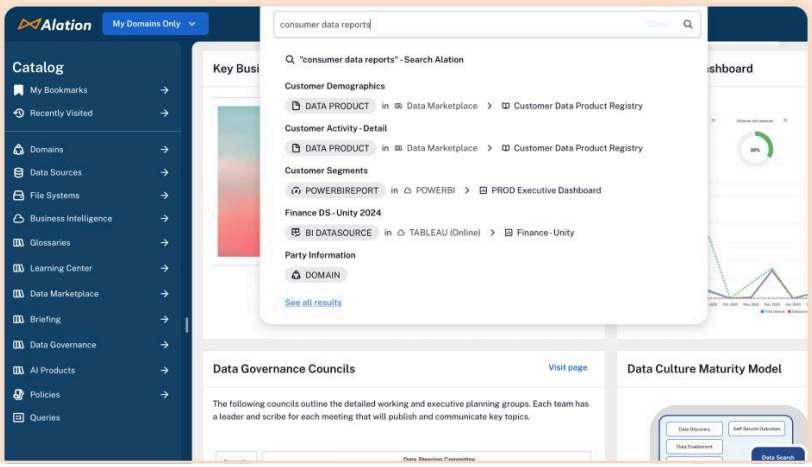

Democratize the Lakehouse

Empower all data personas — from data analysts to business users — to harness the power of the Lakehouse, regardless of technical background. Alation's intuitive interface serves as a single pane of glass that enables everyone to discover, understand, and use trusted data products for better decisions.

Accelerate Regulatory Compliance

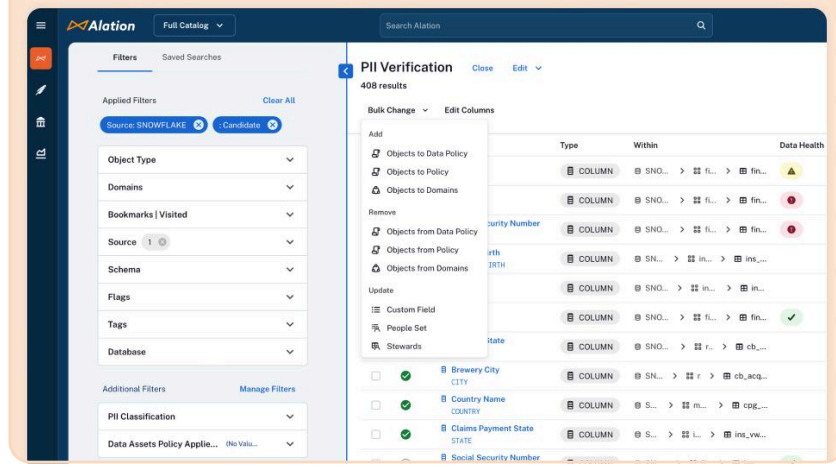

Complement Unity Catalog by serving as the business governance layer to drive compliance with frameworks like GDPR, HIPAA, CCPA, and BCBS 239 across your organization's entire data landscape.

Products

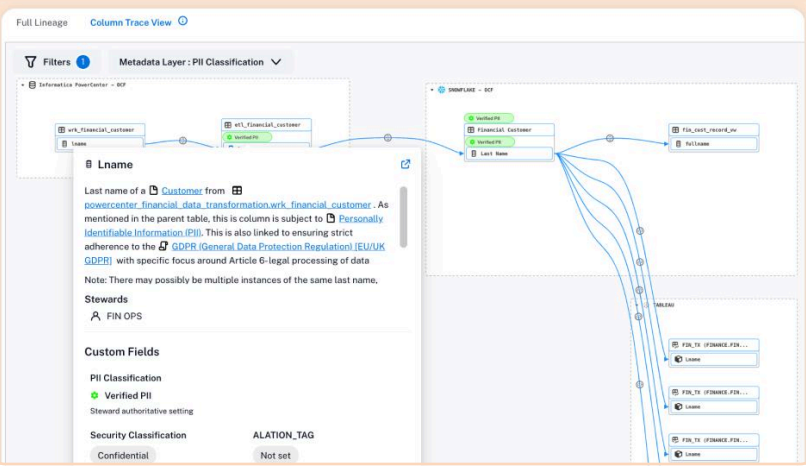

Catalog of Catalogs

Alation is the **Catalog of Catalogs** — seamlessly extending Unity Catalog's reach to unify and govern all your data, wherever it lives.

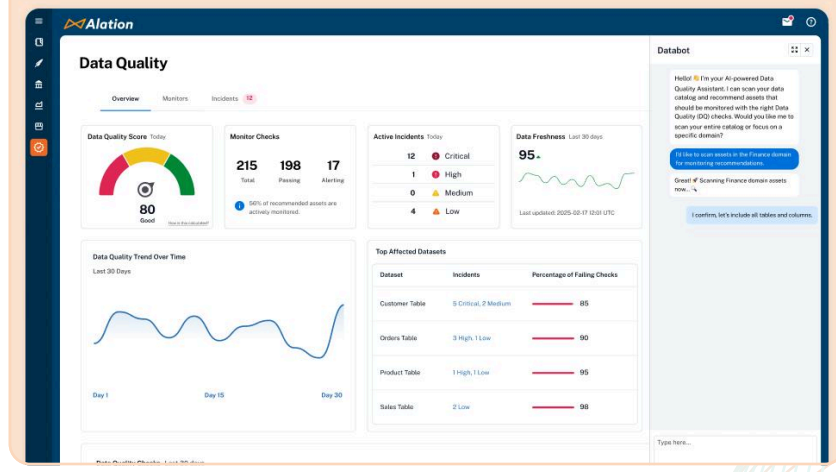

Data Governance

Simplify governance for success. Create all your policies in the Data Governance Policy Center to actively manage risk and compliance

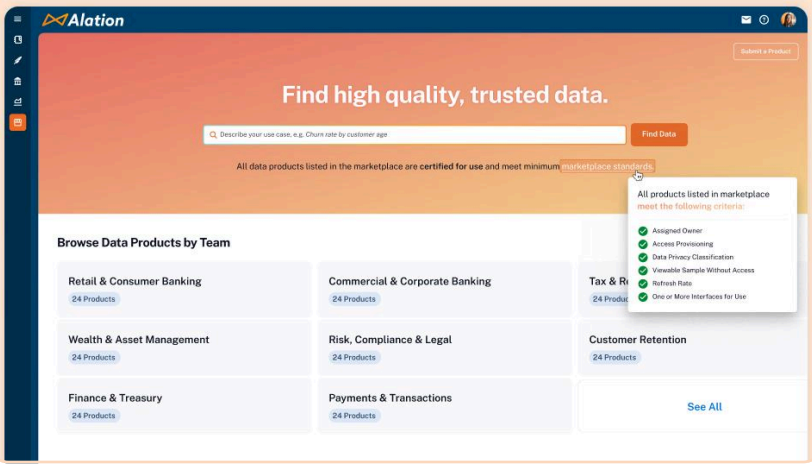

Data Lineage

See the full story of data. Visualize data relationships easily with automated column-level lineage. Get a birds-eye view of lineage, or zoom in to explore details

Data Quality

Ensure trust in data with AI-powered data quality prioritization, proactive monitoring, and automated rule application — providing confident insights at enterprise scale

Data Products Marketplace

Enables fast, trusted access to reusable data products, empowering teams, apps, and AI to accelerate business impact while ensuring governance and compliance

Regulatory Compliance

Drive compliance with GDPR, HIPAA, BCBS 239, and other regulatory frameworks through automated and integrated governance controls that span your entire data landscape

Platform Services

Alation Platform Services provides the foundation for trusted data management, empowering organizations to scale data initiatives, ensure compliance, and drive innovation. Built on an open, extensible architecture, Alation Platform Services offer seamless integration with existing data ecosystems, enabling secure, governed access to reliable data across the enterprise.

- **Active Metadata Graph:** Provide a dynamic, interconnected view of metadata to improve data discovery and governance
- **Workflow Automation:** Streamline data stewardship tasks, enabling efficient governance and faster decision-making
- **Security:** Ensure robust data protection and compliance with industry regulations across the data lifecycle
- **ALLIE AI:** ALLIE AI builds upon Alation's machine learning (ML) core to enable organizations to save time and scale data initiatives more efficiently and democratize trusted data
- **Open Connector Framework:** Unlock valuable insights with a breadth and depth of connectivity to data sources across the enterprise
- **Open Data Quality Framework:** Get a unified view of data health by integrating data quality tools and metrics across your data estate
- **APIs:** Enable seamless integration across data ecosystems, automating workflows and accelerating data-driven innovation
- **AI Agent SDK:** Seamless data intelligence integration helps organizations build secure AI applications

Discover why 40% of Fortune 100 Choose and Trust Alation

> Alation helps us to have confidence that our data is trusted and fit for purpose...
